# kitchen ware edito

## Hello,

We are excited to meet you again in the International Home & Housewares Show 2017 and Hong Kong Houseware 2017 fairs special edition.

Turkey national participation organization to the International Home & Housewares Show 2017 fair is done 13th time this year by Istanbul Mineral and Metal Exporters' Association (İMMİB). İMMİB participates in the fair with 10 companies, taking up a total of 232 sqm in the North and South halls of the fairground. Kitchen, bathroom and house goods of cast, non-stick, enamel, plastic, melamine, metal and glass are exhibited in the fair by the participant companies.

This year our 25 companies attend to the Hong Kong Houseware 2017 fair, to which we have organized national participation for the 13th time. Our national participation stands covering 579 sqm, are located right in front of the entry of 3D hall, where the visitor attention is high. House-bathroom wares made of plastic and metal, cooking equipment of stainless-steel, cast and aluminium and glass souvenirs are exhibited in the national participation stands.

Let's have a look at the subjects we have in the magazine, which you will read with joy. We have Vestel in this edition on Brand History page. Founded in 1984, Vestel has one of the biggest industrial complexes on an area of 1,1 million sqm in Manisa. Kastamonu Plastik, CVS, Penguen Home and Tutku Metal are the other companies we interviewed with...On the Styling pages, we present you the most authentic and new designs specially prepared for 2017 by Turkish kitchenware sector. We are sure that these original designs of Turkish companies will draw your attention as well.

On our Nostalgia page, we have "felt" described as "a kind of rough cloth made by pressing fleece or goat hair", which used to be used for table cloth, ground cloth or tent and used for clothes, accessories and kitchen ware now.

Turkish designers Hande Yılmaz, Başak Oğuzalp and Burak Koçak told us how they fell in love with the profession and shared their very special designs with us.

Chef of Seraf Restaurant, Fuat Gören, who started as an old hand and bettered himself with various trainings, told us about the Anatolian cuisine and made us taste the delicious samples he prepared.

On our Travel Page, we take you to Safranbolu; one of the tourism heavens of Turkey with charming houses, historical values, city culture and natural beauty. Known as one of the cutest towns of Anatolia, Safranbolu deserves more than an excursion and is ideal for spending a weekend or even a summer vacation. Safranbolu invites all those, who would like to see how the nature and art can be harmonized...

On our İstanbul&Architect page we take you to Grand Piyale Pasha Mosque in İstanbul which was completed in 1573. The mosque is famous for its tiles and it stands out as one of the works created by the architect Mimar Sinan at the same time with Selimiye Mosque.

See you...

**TELVE TURKISH**  
**COFFEE MACHINE**

Arçelik Telve, presented with three colour options as red, white and black, meets with the customers with an elegant design and large capacity. The newest model of Arçelik Telve, K3300 offers the real Turkish coffee taste with rich foam thanks to Cooksense technology. The product, which allows to cook Turkish coffee in a traditional palate through its coffee pot with a stainless-steel bottom, makes it possible to prepare coffee for one or three at once. It is possible to prepare coffee easily with a button with the product that comes along with anti-spill technology, which prevents boil over. The product, alerting with a sound when the coffee is ready, takes up less space thanks to its compact design.

## STAR WARS FAMILY OF VESTEL IS EXPANDING

Vestel added new ones to its Star Wars themed products, which was realized in parallel with the objective to present the consumers the very firsts. Mix&Gos, Toasters, Coffee Machine and LED TVs of Vestel, in the form of Star Wars characters, are waiting for all Star Wars fans. Star Wars E3100 R/K Toaster provides 7 level control option for those, who want to toast the bread at choice. Providing heating and defrosting functions, Star Wars E3100 R/K Toaster is on sale with two different themes. Another product Vestel has included among Star Wars themed products, K3100 Inox Coffee Machine is the preference of crowded families with its glass coffee pot of 12 cups capacity. Star Wars K3100 Inox Coffee Machine with a stainless-steel body provides a continuous coffee delight up to 2 hours thanks to its special hot plate.

[www.vestel.com.tr](http://www.vestel.com.tr)

## PRACTICAL & USEFUL PRTK MANGAL

The charcoal Prtk Mangal has a cast aluminium body that is resistant to corrosion. It is practical because you do not need to assemble it; it is ready to use, and you can store it easily after use. When you open it you can make different grills at two sides (meat and chicken or vegetable and meat etc.) Grill surfaces are food safe. Furthermore, it is easy to carry because it weighs only 2.5 kg. The charcoal Prtk Mangal grill gives you everything you need with its ergonomic design. The Prtk Mangal is an ingeniously designed and incredibly practical barbecue which doubles its surface area when fully opened. The compact and lightweight construction also makes it perfectly portable. The faux retro design is a treat for the eyes.

### STAINLESS AND ANTIFINGER PRODUCTS

Ansan Metal and Plastik is a company providing service on bathroom accessories and garbage cans are the main part of its product range. Metal and Plastik material is used together in Ansan Metal products. The products are manufactured as stainless and antifinger. It is possible here to find garbage cans in various sizes and with different lid types.

[www.ansan.com.tr](http://www.ansan.com.tr)

### MAKE IT CLEAN WITH METE PLASTİK DUSTBINS

Mete Plastik's waste bins can be adapted to all kinds of usage. Their bins have different colour options with various logo options and their production is according to ISO 22000, ISO 9001, ISO 14001 and TS 18001 and TUV cert procedures. In order to have more details, please visit the link at [www.mete.com.tr](http://www.mete.com.tr)

## GARBAGE NEEDS A GARAGE

You shouldn't underrate a garbage can. There are many different kinds of them that are made of many kinds of materials, little ones, big ones etc. It is also important that they are practical, easy to use, i.e. functional as well as they have proper colors, design, size and materials.

### RATTAN, BRAIDED, LACE

There are garbage cans in Kastamonu Plastik with different models and sizes. Except from rattan, braided, lace, decorated garbage cans, pedal garbage cans, there are also industrial garbage cans. Also for Kastamonu Plastik, just like for us, garbage cans are of capital importance in terms of health, as they are used in all parts of our houses and gardens. Kastamonu Plastik cares about the garbage can production as it cares about foods. With the importance given to garbage cans and rigorous work carried out on them, Kastamonu Plastik also steps forward in this field.

[www.kastamonuplastik.com](http://www.kastamonuplastik.com)

### THERE ARE GARBAGE CANS WITH ANY LENGTH AND SIZE IN BORA PLASTİK

Bora Plastik, one of the leading companies of Europe in its sector was founded in 1957. Bora Plastik, continuing to manufacture Plastik kitchenware, houseware and gastronomy products and adding new ones to its product line has increased its number of products over 600. There are pedal, swing/push, round and industrial garbage cans in various sizes and lengths in the product range of Bora Plastik that manufactures its quality and decorative products giving particular importance to human health.

[www.boraplastik.com.tr](http://www.boraplastik.com.tr)

### NESTED, PROVIDING MORE STORAGE

Dünya Plastik, founded in 1973 in Plastik sector is not only selling its products to the domestic market but exports them with its own brand to many countries. Dünya Plastik, blending its 40 years of experience with the technological improvements, is continuously widening its product range and providing service to its customers with a variety of products from garbage cans to storage boxes and from bathtubs to kitchenware.

The garbage cans, providing advantage up to 80% in storage and transport with their nesting feature, are more powerful and durable with their metallic mechanisms.

## TUTKU METAL ADDS ROLLER PRODUCT GROUP TO ITS PRODUCT RANGE

Stating that the current product lines are enhanced with new automation investments, Özden Özgür Kişioğlu said: "We have added a brand new type to our product range by adding Roller production technology to our production facility of aluminum kitchenware".

Following the trends abroad while aiming to make a difference in the market, Export Manager Özden Özgür Kişioğlu provided an interview to Turkish Kitchenware about Tutku Metal.

### COULD YOU BRIEFLY TELL US ABOUT THE ESTABLISHMENT PROCESS OF YOUR COMPANY?

Our company has a three generation long history. Our initiatives first started with copper-working three generations ago and currently we are operating in the sector with steel and aluminum kitchenware. Our company was founded in 1990 under the name of Tutku Metal in the central district of Kahramanmaraş.

As one of the oldest companies in the sector operating in an area of 30 thousand square meters, our company markets stainless steel kitchenware and manufactures aluminum ceramic kitchenware. Thanks to our experience build-up over years in the kitchenware sector, we professionally manufacture our goods by utilizing high technology.

### HOW DO YOU CREATE NEW DESIGNS? DO YOU HAVE A R&D DEPARTMENT?

We first analyze the demand in the market and observe the needs and requests of consumers while creating new designs. We develop products in line with the demands of consumers with these methods. As we also have an export market, we follow the trends abroad. As a result of all these observations and analyses, we manufacture the most convenient products for the market both in terms of costs and usage and we try to create a difference in the market as our goal is to be of help to our valuable customers who use our products in their kitchens.

### COULD YOU TELL US ABOUT THE INVESTMENTS YOU MADE IN 2016?

Despite the shrinkage in the sector in 2016, we enhanced our current production lines with new automation investments for the purpose of keeping pace with the competition in the market and for increasing our production capacity. Apart from this, we have added a brand new type to our product range by adding Roller production technology to our production facility of aluminum kitchenware. Therefore, we aim to increase our market share and reach customers in each category by adding Roller products to our range of 4 mm and 3 mm forged aluminum products.

### ARE YOU ENGAGED IN EXPORTATION AND WHICH COUNTRIES ARE AMONG YOUR PORTFOLIO?

The majority of our production capacity targets exportation. We mainly work in Europe and Middle East. We manufacture goods for many companies that have certain brand values in Europe as a private label.

### COULD YOU TELL US MORE ABOUT YOUR PRODUCT RANGES?

We have stainless steel cooking pots, classical and automatic pressure cookers, fry-pens, teapots, couscous pots, cookware, aluminum, ceramic and granite goods. Attributing special attention for quality, our company considers manufacturing high-quality goods as a principle despite the price competition in the market.

## PENGUEN IS BECOMING A GLOBAL BRAND

CEO of Penguen Home Mehmet Oturakçı notes that they have high hopes for 2017 and adds that: "We have a strong faith in overcoming the challenges as a nation. We believe that we will grow more in this direction and we plan to move towards foreign markets. Our goal is to take first steps into making Penguen a global brand".

**M**ehmet Oturakçı, CEO of Penguen Home says that they have started their career under the guidance of their father in 1970 and highlights that they registered the Penguen brand in 2003. He adds: "We wanted to sign our names under the quality we offer for the market". Mehmet Oturakçı have an interview to Turkish Kitchenware about Penguen.

### **COULD YOU TELL US ABOUT YOURSELF, PLEASE?**

I was born in Şanlıurfa in 1969. After graduating from the primary school in Şanlıurfa I started to work nearby my father as an apprentice. In other words, I continued my education in the school of hard knocks so to speak.

### **WHEN AND HOW WAS YOUR COMPANY ESTABLISHED?**

Penguen Home was found in 2003. But our family started business life in 1970 under the guidance of our father.

We continued our career with exportation in 1993. We then had the urge to establish our own brand in 2003. Penguen is our registered brand. We wanted to sign our name under the quality we offer for the market and registered Penguen in our name.

### **CAN YOU TELL US ABOUT YOUR PRODUCT RANGES?**

Our main product group consists of thermos bottles in different models and sizes. Besides, we have steel and silicon small kitchenware ranging from knives, cake pans and moulds, scoops, strainer sets, spatula and graters.

### **DO YOU THINK 2016 WAS A YEAR DURING WHICH YOUR EXPECTATIONS WERE MET?**

As a company, we were also negatively influenced by the adverse effects due to the attempted coup of July 15 and the wrongdoings of external forces upon our nation. For this reason, our expectations were not fully met this year.

### **ARE YOU HOPEFUL ABOUT 2017?**

Yes, we are. We have a strong faith in overcoming the challenges as a nation. We believe that we will grow more in this direction and we hope to move towards foreign markets. Our goal is to take first steps into making Penguen a global brand.

### **HOW IMPORTANT IS CUSTOMER SATISFACTION FOR YOUR COMPANY?**

Customer satisfaction sets the keystone of our success criteria. I can confidently say that our priority in business life is customer satisfaction and their contentment about our products. In this respect, I believe high-quality products, honesty in services and sincerity are the keys to success.

### **DO YOU THINK THERE IS UNFAIR COMPETITION IN THE SECTOR?**

Low quality and cheap products that are sold in lower prices in our sector becomes an obstacle for us to express our objectives to customers.

## OVER A THOUSAND PRODUCTS FROM KASTAMONU PLASTİK

Kastamonu Plastik, exporting to many countries such as USA and European and African countries, in particular to Poland, Czech Republic and Saudi Arabia, adds approximately 50 new products every year to its variety of products that is already over 1000. Quality and Operational Manager Sümeyye Yilmazer states that among the top selling products, there are laundry basket, storage box, pedal and packaging bins.

Chemistry Engineer Sümeyye Yilmazer, Kastamonu Plastik Quality and Operation Manager states that they are the starters of mesh trend in 2016 among the Plastik companies in Turkey and adds that they put approximately 50 new products every year in the market.

**HOW LONG HAVE YOU BEEN IN THE PLASTİK SECTOR? WHAT IS YOUR PRODUCTION CAPACITY AND FOR HOW MANY PEOPLE DO YOU PROVIDE EMPLOYMENT?**

We have been in the Plastik sector since 1980. Starting with retailing in Tahtakale, we continue in a factory on

a 26 thousand square meters closed area, with a capacity of 100 machines. Furthermore, we have a sales outlet in ISTOC 5th Block. Our company conducts its commercial activities with a personnel capacity of 250 people and 200 million imprints/year production capacity.

**YOUR PRODUCT RANGE IS QUITE HIGH. HOW DO THE PRODUCT DESIGNS FORM?**

Every new product brings along a new excitement. Formation process of the product is even more blissful. We are brainstorming all the time to fulfill the expectations of our customers and to satisfy them. We share the conflicts

of opinions with our designers. In the end good projects come forward and later on one project becomes the basis of another. This process continues in a chain reaction.

**WHAT KIND OF DIFFERENCES DID YOU MAKE IN PLASTİK KITCHEN UTENSILS IN 2016, WILL THERE BE NEW PRODUCTS IN 2017?**

We work very hard to get the consumers to break the tradition and make the kitchen work more joyous, easy and colorful. Consumer profile that we put the most importance to is the housewives and if we can make them happy, we can make all our customers

happy. We imprint the patterns that can be liked by housewives in to make their works more joyful and I can say that we create a fashion trend in Plastik. I can say that already now, we have succeeded in attracting the attention of especially housewives and supermarkets with the new patterns in 2017. Apart from those we were the company, starting the first mesh trend among the Plastik companies in Turkey in 2016. With the addition of mesh pattern to our product range, we were able to show the consumers what we can do. We are one of the rare companies that produces Plastik furniture. We put approximately 50 new products to the market every year with the pleasure brought by our innovative attitude. We have made the biggest investment to garden equipment this year. We believe that sales of garden equipment will accelerate a lot and even hope that it will be among the top selling products.

**HOW MANY COUNTRIES DO YOU EXPORT TO AND WITH WHICH PRODUCT LINES THE MOST? WOULD YOU TELL US ABOUT YOUR TARGET MARKETS FROM NOW ON?**

First of all, we can divide our product lines into many classes as bathroom, kitchen, storage boxes, decorative products, children, garden, furniture and packaging. Since our company has over a thousand varieties of products, we cannot classify the sales in only a group or two. Each group has a very successful sales curve in its own right. Generally speaking, I can say that our laundry baskets, storage boxes, nightstands, plate trails, pedal bins and packaging bins are the top selling products. Our company sells to American, European and African countries. Nevertheless, majority of sales are to countries such as Poland, Czech Republic and Saudi Arabia.

**HAVE THE GOALS SET FOR 2016 BEEN REACHED? WHAT ARE YOUR GOALS FOR 2017?**

Kastamonu Plastik is a family business and we contribute to its progress as the second generation. The most important objective for us is reliable work and obtaining customer satisfaction, like every

year. After reaching these objectives, profit targets, sales volume and objective markets come along. In 2016 we attained this objective and I have no doubts that we will achieve the same success in 2017 as well, by showing the same devotion. This year in particular, we will continue our operations in a big factory in Silivri. We hope that this factory will prove to

Kastamonu Plastik Violethouse trademark is at the maturation process. It proceeded surely to the point, where it is now. This process has been difficult, exciting and fun as well. Because, you have to be open to changes and novelties proceeding on the way to branding. We have supported the company in its progress with our all the time innovative

be more fruitful in terms of production. Thus, we plan to attain a bigger sales volume with the new factory. Our company participates in various fairs every year. The most important ones for us and for our competitors as well are Ambiente and Hong Kong fairs. We aim with this factory to offer these new products and projects quicker to the market and reach to a wider public.

**YOU ARE A BRANDED COMPANY IN PLASTIK SECTOR. WOULD YOU TELL US ABOUT THE BRANDING PROCESS?**

Every business is born, grows, develops and ripens. And our

attitude. We have taken firm steps by putting at least 40-50 new products to the market every year. We chased new projects with the excitement to fling into a new work, with every works conducted. We raced against time to make debut of any new work. Speed, effort and innovation have provided us with a strong and concrete brand image. Now, we are proud to see our products in many parts of our country and our world. We believe that Kastamonu Plastik Violethouse can be exemplary to new businesses that are on the way to branding with its being a brand known everywhere.

## 3 MILLION SALES IN A YEAR WITH EXPORTS TO 16 COUNTRIES

Dinç Electronics has more than four hundred products with its CVS brand. Fatih Dinç, Administrative Affairs and Coordination Manager notes that CVS holds an important position in the sector with more than three hundred authorized services in every corner of Turkey, exportation to 16 countries and an annual sales rate of 3 million products.

Turkish Kitchenware had an interview with Fatih Dinç who said that CVS has gradually added computer parts, small house appliances and personal care products to its product range.

**HOW LONG HAVE YOU BEEN WORKING IN THIS SECTOR? COULD YOU BRIEFLY TELL US ABOUT THE ESTABLISHMENT STORY OF YOUR COMPANY?**

Established by the Dinç family in 1986, our company started its commercial activities under the title of Dinç Electronics (Dinç Elektronik) in Istanbul, Eminönü with mobile phone sales and importation. In 2002, our brand CVS was founded. Today, our operations take place in our head office

and exposition that is located in İSTOÇ Trade Center. Also, we have a production and storage area of 10 thousand square meters in Halkalı and a logistics center in Gebze that holds an area of four thousand square meters.

**COULD YOU PROVIDE US SOME INFORMATION ABOUT YOUR PRODUCTION RATES AND WORKLOAD?**

Today, CVS turned into a grand family and brand with more than four hundred products ranging from toasters, hair styling tools, computers parts etc. With more than 300 authorized services in all over Turkey, CVS is taking up an important place in this sector with exportation to 16 countries and an annual sales rate of 3 million products.

**HOW DO YOU DEVELOP NEW DESIGNS? DO YOU HAVE A RESEARCH AND DEVELOPMENT DEPARTMENT?**

Our products are made in Turkey under quality and warranty conditions that we determine together with those companies with which we have private manufacturing contracts. Besides, we

have products that we import. In our R&D department, on the other hand, we develop our current goods for betterment and improvement in order to save time for our users and design new products to enable our customers to spend more time with their beloved ones.

**CAN YOU TELL US ABOUT THE INVESTMENTS YOU MADE IN 2016?**

**WHAT ARE YOUR PLANS FOR 2017?**

No drastic changes have occurred in our export and import rates, however the general recession in the market

influenced us as well. Thanks to our good relations with our customers, we managed to realize our short-term and medium-term plans. However, we postponed our long-term plans for 2017. We planned to begin 2017 with new and radical changes. In the meantime, we are encouraged by our faith in the recovery of the sector. We continue to work on a new product range and on increasing the varieties in our current goods.

**ARE YOU ENGAGED IN EXPORTATION ACTIVITIES AND IF SO, WHICH COUNTRIES DO YOU WORK WITH? CAN YOU INFORM US REGARDING YOUR EXPORT RATES?**

As the Dinç Family, we export to 16 countries with our brand CVS among which there is Russia, Romania, Germany, Cyprus, Azerbaijan, Egypt and France. In terms of our export rates, we rank among the Top 50 companies that do exportation in our sector.

**WHAT FEEDBACKS DO YOU RECEIVE FROM THE FAIR THAT YOU PARTICIPATE IN?**

After we host hundreds of guests in our stands and we make a name for our brand in the eye of a certain population, then we benefit from this experience. We try to reach our goals after carefully evaluating this productive period in order to turn our contacts into sales. Our expo team makes one-on-one contacts with all guests during the fair which is an important criterion to measure the productivity of the event. We receive feedback and information from our team regarding the information flow at the fair. We try to direct our future sales work in line with these data.

**CAN YOU TELL US ABOUT YOUR PRODUCT RANGES?**

Considering the market demands,

we gradually added computer parts, small house appliances and personal care products to our first product range. Besides, we continue to work on porcelain products.

**HOW DID YOU REALIZE THE BRAND CREATION AND RECOGNITION PROCESS? WHAT KIND OF INVESTMENTS DID YOU MAKE IN TERMS OF BRAND CREATION?**

The power of a brand is inversely proportional with its recognition process. If you put your brand name on everything, then it will lose its name power. Making short-term extra sales by expanding the brand ends up in a contrary working for branding. If you wish to make a powerful brand in the eye of consumers, you need to narrow down the brand that you are using for that work.

A brand becomes more powerful if it narrows its brand objective. If you dominate in a category, you become even more powerful. If you wish to dominate a category, you will need to narrow down the objective of the brand. As the CVS brand, we narrowed down our target category as "Small House Appliances" and thus we continue to work on becoming a leader in the sector.

The creation of a brand is achieved through promotion, not through advertisement. Big commercial budgets may be needed to protect such great brands as McDonald's and Coca-Cola, but in general, advertisement would not create a new brand.

What other people say about your brand would be much more influential rather than what you say. We want to please consumers and try to encourage our customers to recommend our brand. As CVS, we always try to provide better, more qualified and functional services and goods to our users.

Once created, a brand will require advertisement in order to efficiently maintain. Advertisement budget works just like a defense budget of a nation. You cannot purchase anything with the budget you allocate for advertisement; they will only prevent market shares to fall for your competitors. Currently, we are working on the promotion of CVS in order to protect our position in terms of advertisement by issuing commercials in sectoral journals, using on-car advertising and by being a sponsor for sports.

## BYPALETTE IS

## THE ATTRIBUTES FOR HANDCRAFT

HANDE YILMAZ

We had an interview with Hande Yilmaz who thinks Turkey is in an important position in terms of industrial design just as in many other fields and sectors.

**WHO IS HANDE YILMAZ? HOW DID SHE FIRST ENTER INTO THE WORLD OF DESIGN?**

After graduating from the department of Climatization-Cooling Technology I worked at an insurance company for a while. Then, I did some handcraft jobs that require hand labor such as cupcake and cake designs, curtain and chandelier designs and sold my designs overseas. I have always had an interest in handmade works and I cherish handcrafts. Appreciating and utilizing palettes which belongs to our family for 40 years especially makes me very proud. The idea of transforming and giving life to old palettes after we had Bilge Dilsiz

Designer Hande Yilmaz says: "We design everything we believe that should be combined with hardwood". According to Yilmaz, handcraft is a precious form of labor and should be preserved against all odds...

in our family enabled our partnership with ByPalette and created our brand. We have always followed the general trends, preferences, innovative approaches and fashions in the design world and we still do so. We did a great deal of research and worked on the items we had and figured how to transform them into everyday furniture and accessories. Our interest and preference is directly linked and proportional with the love we have for design...

**IN WHICH SECTORS DO YOU WORK FOR? WHICH FIELDS DO YOU ESPECIALLY PREFER TO DO YOUR DESIGNS?**

We try to create products in every scale; in other words we design anything we believe that should be combined with hardwood...Be it a library, a fireplace in the living room, a tray or a rocking chair... For a period of time, fabricated products became popular in the furniture sector which paved the way for the

expiration of handcrafts and hand labor. We see, however, now that natural and real woodwork are once again becoming to draw attention especially if they are handcrafted. We certainly believe in the preciousness of handcraft and we think it should be preserved against all odds... One may observe this perspective with our approach to production and design.

**COULD YOU GIVE FURTHER INFORMATION ABOUT THE WORKS YOU ARE CURRENTLY ENGAGED IN?**

We design for outdoors; terraces, gardens, sofa groups for houses and winter gardens, accessories and sofas. Besides, we provide custom designs for offices, houses, gardens, children and baby rooms as well as special tables and chairs, coffee tables etc. We also design multi-functional products such as handmade trays, flowerpots, mirrors, service units, libraries and sideboards etc.

**IN YOUR OPINION, WHERE DOES TURKEY STAND IN INDUSTRIAL DESIGN ESPECIALLY IN TERMS OF THE KITCHENWARE SECTOR?**

Design is now a reality for Turkey as well. Without a doubt, we are in a prominent position in the field of industrial design just as we are in every sector.

## " THERE ARE NO BIG DIFFERENCES BETWEEN TURKISH PRODUCTS AND FOREIGN PRODUCTS "

BAŞAK OĞUZALP

As a young industrial designer, Başak Oğuzalp closely follows the kitchenware sector. While comparing foreign products with Turkish products at the Ambiente Fair, she concludes that there are no big differences between the two. Here is the interview with Başak Oğuzalp made by Turkish Kitchenware.

### WHO IS BAŞAK OĞUZALP? HOW DID SHE FIRST ENTER THE WORLD OF DESIGN?

I was born in Ankara in 1993. I studied in Ankara during my primary, middle and high school years. Later, I studied at the Industrial Products Design department of Gazi University, Ankara and graduated in 2016. I discovered my interest in industrial design during my childhood as I always had a passion for drawing and producing something new. I was encouraged by the positive feedback and response I got from people around me. I decided to lead my life in line with my dreams by choosing to study in this department with the support of my family.

### IN WHICH SECTOR DO YOU WORK? WHICH FIELDS DO YOU PREFER TO WORK FOR?

I haven't started to design as a

Başak Oğuzalp has had the chance to compare products by Turkish companies and foreign products at the Ambiente Fair. Young designer Oğuzalp states that innovative products are being developed in recent years especially with the increased attention attributed to industrial design.

professional yet. But I designed many products for various sectors during my undergraduate years and while preparing for design contests. In fact, I do not have a specific preference regarding the field I'd like to work for in the future. However, given my current experiences, I'd like to work in kitchenware design, packaging sector and furniture sector the most.

### COULD YOU BRIEFLY TALK ABOUT YOUR CURRENT WORKS?

I have been competing in design contests since 2015. I ranked in the first place twice at the Industrial Design contest organized by IMMIB (Istanbul Mineral and Metal Exporters' Association) in the category of Metal Student in 2015 and in 2016. I also received awards in different competitions. This year I plan to study in a master's program with the study abroad program supported by the Ministry of Economy.

### IN YOUR OPINION, WHAT IS TURKEY'S POSITION IN TERMS OF INDUSTRIAL DESIGN IN THE KITCHENWARE SECTOR?

In fact, I have positive opinions

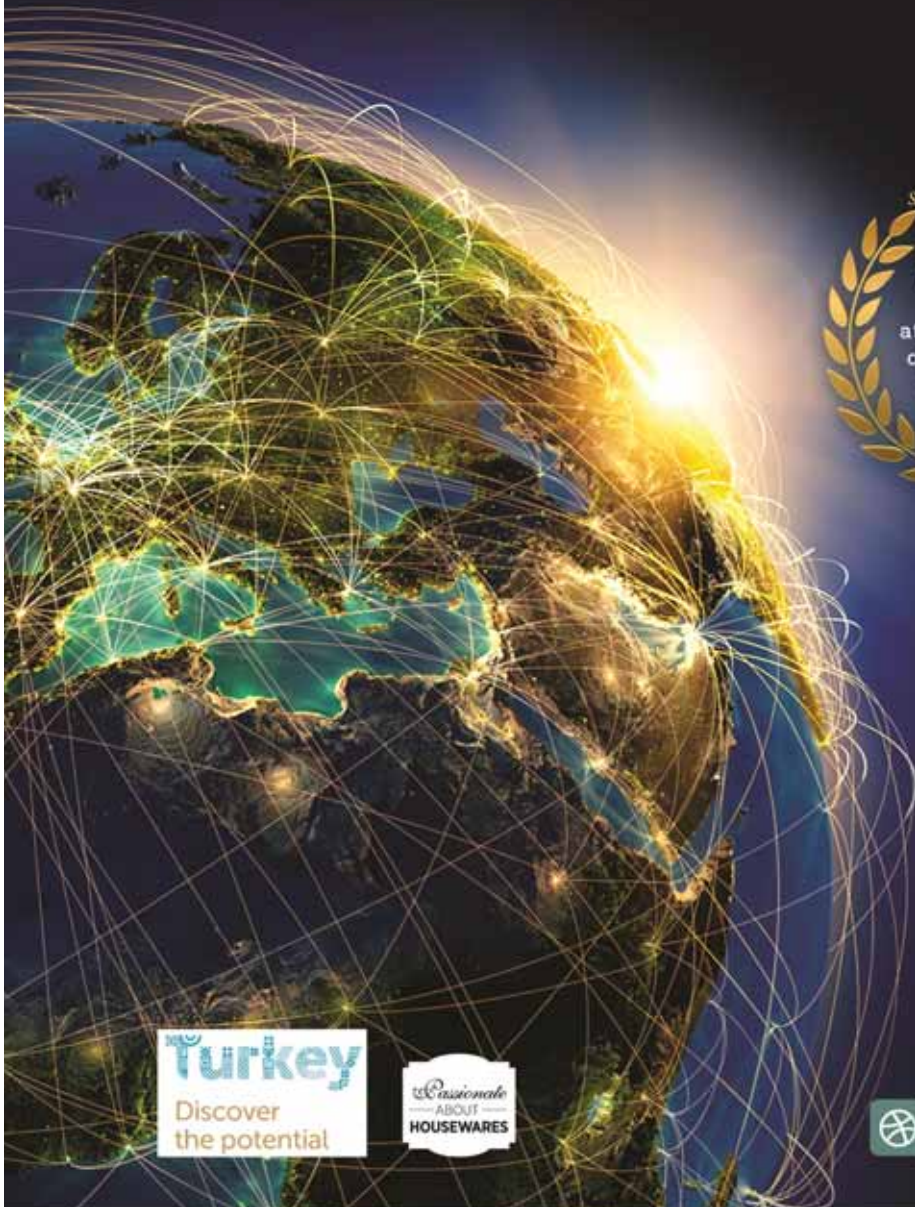

on this subject because I had various opportunities to participate in different activities and events thanks to IMMIB's industrial design contests. Actually, it was through this opportunity that I got to see the Ambiente Fair in 2015. While I was at the Ambiente Fair, I had a chance to compare foreign products with Turkish products. I think there are no grave differences between them. Innovative products are being developed in recent years especially with the increased attention attributed to industrial design. There are big, old Turkish companies in this sector, however I also saw interesting designs by new companies that have actually won prestigious awards abroad. In fact, this is something that we should be proud about. I think IMMIB has a big share in the development of this sector as it supports designers and students in this field. I hope these encouraging approaches continue to grow so that we can have a more efficient and active position in all sectors.

## " WE NEED GOOD DESIGNS, NOT DESIGNS FOR COMPETITION"

Industrial designer Burak Koçak states that demands for timeless and durable designs should increase nowadays and adds that: "While design used to be a factor for competition in the past, good design became a factor for competition today".

Trying to create applicable and functional designs, Burak Koçak answered the questions by Turkish Kitchenware.

### **WHO IS BURAK KOÇAK? COULD YOU TELL US ABOUT YOURSELF, PLEASE?**

I was born in Istanbul in 1991. I studied Industrial Design at Mimar Sinan Fine Arts University, Istanbul and worked as a product designer at Autoban. Then, I did my master's degree in Product Design at Scuola Politecnica di Design, Milano. In Italy, I worked with several Italian companies such as Irsap, Rapsel, Mogg etc. My work for Rapsel was shown at Salone del Mobile which also won the IF Student Design Award. In 2015, I was selected in Red Dot 60 Young Professionals.

### **WHAT KIND OF DESIGNS ARE YOU CURRENTLY WORKING ON?**

I am currently pursuing my great interest that is on furniture and object design. I have always been interested in functional designs that have also plastic values. I especially focus on these two values in my designs and creations.

In your opinion, what is Turkey's position in terms of industrial design?

Industrial design in Turkey has become more common in the last 4 or 5 years. Industrialists who wish to

BURAK KOÇAK

produce goods with added value now know that design is one of the most crucial stages of the work and they are aware of the fact that they either need to have a strong design or marketing department or a strong corporate identity if they wish to sell their good with higher prices. Customers have different and separate expectations from the brand, product and the design. Each of these expectations should be well-evaluated and companies should know about their customers and their needs. Also, they should set their recommendations regarding customer values and focus on meeting these expectations in the best possible way. While design used to be a factor for competition in the past, good

design became a factor for competition today. Therefore, companies who wish to become the best now have to offer best designs to their customers by cooperating with the best designers and they should do it in the most up-to-date way with thinking at least 5 upcoming years.

### **WHAT IS THE MOST IMPORTANT ASPECT OF A DESIGN?**

First of all, the designs should be easily applicable. I think designers are often scaring producers with good but difficult projects. I try to create sufficient and functional designs. While doing so, I also make sure that they have plastic values as well. We are all creative identities who believe that a better world can be designed. Improving the self, reading, researching are important factors just as in every other field. Yet, there is another important factor in design, which is to be open-minded and skeptical. We need to be able to say that nothing is right, while also nothing is wrong.

OFFERING DELICIOUS TASTES OF ANATOLIAN CUISINE, SERAF RESTAURANT'S CHEF FUAT GÖREN CLAIMS THAT TASTE COMES FROM THE COMBINATION OF CORRECT INGREDIENTS AND CORRECT COOKING TECHNIQUES.

### Seraf Restaurant

Deriving its name from "serf", meaning eating food in Ottoman Turkish, Seraf Restaurant was first established to cherish the archaic culture of Anatolia's spirit. Offering delicious food under the shadows of pomegranate, olive and tangerine trees in the midst of Istanbul's business world, Seraf Restaurant serves as an oasis in the city center with its 611 square meter terrace. Opened in 2016 with its 548 square meter kitchen and three special dining halls for 22, 24 and 26 persons, Seraf has a facility of 2 thousand 366 square meters in total and offers high-quality delicious dishes with its experienced staff members. As a representative of Anatolian cuisine, Seraf transforms its menu in accordance with the season and offers natural and healthy food for its diners.

" FERTILE SOILS OF ANATOLIA ENRICHES ITS CUISINE "

As a self-taught cook who later received education with various training programs, Fuat Gören told us about Anatolian cuisine and offered us a variety of his delicious dishes.

**WHEN DID YOU FIRST REALIZE YOUR INTEREST IN COOKING? HOW DID YOU FIRST START?**

Ever since I was a child, we can say. It was also an influence that my father was also a cook.

**DID YOU GET ANY TRAINING OR ARE YOU A SELF-TAUGHT COOK?**

I started my career as a self-taught cook. In time, however, I took some courses and participated in various trainings to improve myself and my skills.

**WHERE DID YOU PREVIOUSLY WORK? HOW AND WHEN DID YOU START WORKING FOR SERAF RESTAURANT?**

My career started in Konyalı restaurants. Later, I

worked at different restaurants. I started to work with Seraf Restaurant in June 2016.

**IN YOUR OPINION, WHAT ARE THE MAIN CHARACTERISTICS OF TURKISH CUISINE?**

Anatolian cuisine, which holds elements from different civilizations and cultures is a special cuisine. Considering the fertile soils of Anatolia, we have a rich cuisine.

**IN YOUR OPINION, WHAT IS THE SECRET OF COOKING DELICIOUS DISHES?**

With correct ingredients and correct cooking techniques, one can achieve their favorite tastes.

**WHAT IS YOUR FAVORITE DISH AND WHAT IS THE BEST DISH YOU CAN COOK?**

My favorite dish to cook is "Sac Tava" (Stir Fry). It is an amazingly delicious dish if cooked correctly.

## Humus

**Ingredients:**

1 cup of chickpeas  
1 dessert spoon of tahini  
Extra virgin olive oil  
Salt

**Directions:**

Soak the chickpeas in hot water over night. Boil them the next day and remove the peels. As you grind them in the food processor add tahini, salt and olive oil.

## Sac tava (Stir Fry)

**Ingredients:**

200 gr suckling lamb  
50 gr tomato  
30 gr green pepper  
10 gr oil  
Chilli flakes, salt

**Directions:**

Marinate the meat cubes. After resting them for one day, cook them in high heat. Add tomatoes and peppers. Serve after cooking for 15 minutes.

## İncir uyutması (Traditional Turkish Fig Pudding)

**Ingredients:**

10 dried figs  
1 teacup of milk  
1 dessert spoon of butter  
½ teacup of vanilla  
Coconut for topping  
Crushed walnuts while serving

**Directions:**

Soak the dried figs in hot water for about an hour until they get soften. Then boil them with milk after cutting them into cubes. Add butter and vanilla. Process them with a blender. Put coconut on top and serve with walnuts.

## Vestel exports to 153 countries

Vestel, operating over 35 years with its 23 companies, 16 of which is abroad, is at the forefront among the biggest technology companies of the world. Turan Erdoğan, Executive President of Vestel Corporate Group states that Vestel having exported the first to England in 1988, is the export champion in its respective sector for 18 years, exporting its technology to 153 countries today.

Turan Erdoğan / Executive President of Vestel Corporate Group / [www.vestel.com.tr](http://www.vestel.com.tr)

**B**eing the export champion in its respective sector for 18 years, Vestel is trying to spread the Turkish technology to the world. Let's get to know Vestel closer from A to Z!

### **WOULD YOU BRIEFLY TELL US ABOUT HOW VESTEL WAS FOUNDED?**

Vestel, one of the biggest technology companies not only in Turkey but also in the world, with the pride of domestic production, was founded in 1985. Having been purchased by Ahmet Nazif Zorlu in 1994, Vestel has been operating since then under Zorlu Holding. After being purchased by Zorlu Holding, Vestel started with white appliances in 1994 and Vestel City, which is one of the biggest factories of Europe, was opened in 2003.

Vestel serves for over 35 years with its 23 companies, 16 of which is located abroad, operating in electronics, white appliances, digital products and information technologies, defence industry. Having made the first export to England in 1988, Vestel becomes export champion in its respective sector for 18 years, exporting to 153 countries today.

### **HOW DID YOU MAKE THE BRAND INVESTMENT PROCESS AND RECOGNITION OF VESTEL? WHAT KIND OF INVESTMENTS HAVE YOU MADE UP TO DATE FOR THE ESTABLISHMENT OF THE BRAND?**

Vestel is one of the leading technology brands, not only of Turkey but also of the world. Creating a brand, and particularly establishing one that presents the Turkish customers with the firsts, is a long and demanding process. Since the first day of establishment, we have been trying to reach to the technology to the four winds of Turkey and spread the Turkish technology to the world. With this philosophy, we have adopted since the very first day, we have realized successful deeds and we have come an important way. And we have made it through long term thinking.

A leading brand should address to everyone. To the youth, adults, women, to those who know well or little about technology; we made it our goal to ensure benefits to everyone in Turkey with the things we have done. We have human focus, closeness and sincerity in the basis of our name and brand. Now with our widespread shops all around Turkey, we focus on being there for all the needs of our customers

regarding technology. We continue to create values for consumers and invest in our brand for sustainable success. We are interacting therefore, with our customers on all physical and digital channels.

### **HOW DO YOU COLLABORATE WITH LOCAL OR FOREIGN DESIGNERS, WHEN YOU DESIGN YOUR PRODUCTS?**

As Vestel, our benchmark in the technology we produce is to produce the latest technology products that are easy-to-use and present these with a rich understanding of design. The most important detail in this sense, is to develop products that would facilitate the life of our consumers all around the world, by following the trends. We may have common studies with our industrial designers in Vestel City along with design companies and designers that are successful in their respective fields from time to time. We have a wide portfolio in this regard and we render support in accordance with the target market and needs, not more than 10% of the total design activities. The fact that we return with an armload of awards from the organizations considered as the ration card of the design world, shows that we are on the right track.

**WOULD YOU INFORM US HOW MUCH OF THE PRODUCTION IS FOR DOMESTIC AND HOW MUCH IS FOREIGN MARKETS ALONG WITH THE WEIGHT OF VESTEL IN THE SECTOR?**

As Vestel, we have maintained our championship in export by increasing the number of countries to export to 153, despite all the uncertainties and stagnations in global markets. We continue to grab a slice of history by following an active process both in domestic market and foreign markets, where we dominate. With a total of 23 companies, 16 of which is abroad that are under Vestel Conglomerate, we present a wide product range in the fields of consumer electronics, white appliances, information technologies and digitals to the whole world. Taking a look back to the first half of 2016, we continued to grow as Vestel, despite the downsizing in Europe, in the TV market, at which we are the leader in Turkey by a long shot and we ranked as the second in Europe. And in white appliances, which is another main market of ours, we have become the biggest 5 manufactures of white appliance market in Europe and first three players of the sector in Turkey, with the products we developed by following the trends closely.

The technology that we reach to the four comes of the earth takes a different shape depending on the cultures and this brings us the success in export. Over 75% of the products we manufacture is exported and this contributes considerably in settling the primary deficit of Turkey.

**DO YOU HAVE BRANCHES ABROAD?**

We have a broad sales and marketing network, thanks to our companies in sales and marketing abroad in various countries, as well as our distributor companies.

**WOULD YOU BRIEFLY EXPLAIN US YOUR RANGE OF PRODUCTS?**

We, as Vestel, will continue to maintain our powerful position in the TV market, where we already are a leader by long shot in Turkey and second in Europe. We have presented our customers the new world of “Internet of Objects”, “Smart Houses” and “Smart Cities” in the white appliances market, where we dominate, and we contributed considerably to them with our record holder products that make a big difference in energy efficiency. We will keep on developing our technologies

according to the needs and desires of our customers, with these concepts in mind. On the other hand, we will expand the export network of Venus, the first smart phone of Turkey, which we created by merging our power generated with the experiences we had with TV market and the power of design and production. Just like the way we create a perception in the television and white appliances sectors and reach our technology to 153 countries, we will make this perception in phone as well, permanent.

**WHAT ARE YOUR PLANS FOR THE UPCOMING YEARS?**

One of the most important agenda of the world’s most important industrial giants is the Internet of Objects and harmonization studies to Industry 4.0. As Vestel, our most important priority is Industry 4.0 transition. Looking at our long-term vision, “Mobility” and “Connectivity” technologies with Industry 4.0 concept, constitutes an important part of the R&D studies of Vestel. Services provided under the Smart Houses, Smart Cities and Internet of Objects concepts will be a field, where you will frequently hear of Vestel. Besides releasing smart products, which can communicate with each other and be controlled via mobile devices, we will invest in the connection infrastructure thereof. Our studies to make Vestel City the first smart factory of Turkey, will go on full force in 2017.

## SAFRANBOLU INVITES YOU

With its impressive buildings, historical sites, city culture and natural attractions, Safranbolu is one of Turkey's touristic heavens... Known as one of the prettiest towns of Anatolia, Safranbolu is an ideal destination for a weekend trip or for a long summer vacation as a daily tour may not suffice to make the most of it. Safranbolu invites those who wish to closely observe the harmony of nature and art...

Once known as Anatolia's most important trade center, Safranbolu is now recognized with the touristic value it attributes to Turkey. As one of the touristic towns of Karabük, Safranbolu welcomes many domestic and foreign tourists with its impressive houses. Although traditional houses come to mind when speaking of Safranbolu, this magical place offers many other things as well. Safranbolu is

one of the most attractive sites of Turkey with its history, city culture, life-style, tradition and customs as well as with its houses and mansions along with its natural beauties...

Those who prefer to spend a weekend or summertime there may witness the harmony of nature and art. World-famous Safranbolu mansions and houses in the historical center, Safranbolu Shoemakers' Market (Yemeniciler

Çarşısı), Bakırcılar Çarşısı (Coppersmiths' Bazaar) and little shops where souvenirs are sold that are special to Safranbolu are among the places that should be visited. Yet, Safranbolu is not all about souvenirs and coppersmiths' works. It should be noted that there are many other places that can be visited for those who wish to stay longer to discover Safranbolu. Let us make a trip to Safranbolu together...

## DISCOVER THE NATURAL BEAUTY OF TOKATLI CANYON

Safranbolu Tokatlı Canyon is a place where you can discover the natural beauty of Safranbolu apart from its historical values. One side of the canyon lies towards the Tokatlı Village while another lies along the Gümüş District of the Old Bazaar. Waterfalls, singing birds, fresh air and many more awaits you as you take an amazing walk besides the river. At the height of 80 meters, Crystal Terrace represents a first and only in Turkey as it offers you the best view of the Tokatlı Canyon. This terrace has the capacity to carry 75 tons of weight whose base is made of an extremely durable, unbreakable glass. This terrace is set right at the edge of a cliff. Since you can see the height where you stand through the glass right below your feet, you will find yourself in an extremely exciting experience. It is possible to capture fantastic photographs of the Tokatlı Canyon from the 11 meters wide Crystal Terrace which is located in Safranbolu İncekaya. The 116 meters long İncekaya Aqueduct is a fascinating structure. You can find it on your left once you get down from the Crystal Terrace to Tokatlı Canyon. Tokatlı Creek flows below the aqueduct whose width ranges from 110 to 220 centimeters. Lying along the creek, the walking track is the best route of Tokatlı Canyon. The aqueduct was constructed by the Grand Vizier İzzet Mehmet Pasha to bring water to Safranbolu.

## A MASTERPIECE OF ART: KAYMAKAMLAR GEZİ EVİ (GOVERNORS' HOUSE)

There are many beautiful and historical houses in Safranbolu which are conserved by the Ministry of Culture since 1976 as a "Protected Area". Safranbolu Kaymakamlar Gezi Evi (Governors' House) is one of these protected areas. As a masterpiece of art with its wooden architecture, this house is an exemplary structure where geography is in harmony with people and where architecture is shaped by a certain life-style. This three-storey house with its seven rooms and a beautiful garden should definitely be seen. Each corner of this house is embedded with special carpentry and handcraft. Doors, window frames, ceilings and almost everything except for the walls are made out of wood.

## FELTS ARE MADE INTO UNIQUE PRODUCTS IN THE HAND OF ARTISTS

Defined as a "coarse fabric made out of matting, condensing and pressing grease wool or goat hair" in the dictionary, felts used to be used for the making of cloths, tents and rugs while today they are used in the making of attires, accessories and kitchenware.

It is possible to define felt as a form of textile or fabric consisting of the matted, compressed animal fibers such as mammals like sheep, rabbits, camels and llamas as well as the mixture of angora goat wools in an alkaline condition with the help of water, soap and heat. These textiles are matted without warps... As one of the oldest forms of handicrafts, felts continue to be used in contemporary times in daily life thanks to their practicality and visual quality. Felts

are sometimes used in tents, cloaks, boots and clothes for their isolating feature and sometimes they are made into beautiful artwork in the hands of artists.

There is a mention of felt in the oldest scripture by Homer, namely the Illiad. Following the Battle of Manzikert in 1071, nomadic Turkic tribes migrating from Central Asia to Anatolia have also brought their cultures along. Art of felt is among the handicrafts brought by these

tribes. Konya, Diyarbakır, Afyon, Isparta, Uşak, Urfa and Bursa were the production centers of felts in the Ottoman times. Felts have always been utilized by Turks even back in Central Asia. Art of felt had a significant place in the guilds which were among the

ahi-community. Master-builders and masters were learning how to flock wool, stomp wool by feet, prepare wool into the case as well as methods to cook felts in baths during a preparation period of six or seven years.

## JUST LIKE A HOBBY

Felts which were used in various areas in the past were doomed to be forgotten with the rise of industrialization. However, with the convenience of felt making today it has now turned into a type of hobby which prevented its fall into oblivion.

The areas of usage of felts can be briefly explained as follows: earlier, it was possible to see felts in the everyday life in Anatolia. Felts were commonly used in tents, saddles, sofas, hall rugs, quilts, pillows, prayer rugs, beds and cushions both in tents and houses. Besides, there were also various felts for other uses such as in door mats, felts for covering milk boilers, felts for covering saddles, harnesses, shoes, tandouris as well as doors, flask cases, bags, saddlebags, woolens, puttees, ball felts, cloaks, cones, slippers, boots, socks, shoes, trousers, coats and belts etc. However, felts are no longer as common as they used to be with the changing standards of modern life. Machine-woven carpets are much more preferred than felts now. This also influenced the rural areas as well since felts are no longer used in regions with animal husbandry.

## WORKSHOPS ARE SHUTDOWN

Art of felts were made with tamping method in the past. Now, there are two new methods, namely "wet felting" and "dry felting". With these new methods, the traditional tamping method which was challenging is now more practical. Wet felting is almost the same with the tamping method; yet neither workshops nor physical labor is necessary for felting anymore. The felting procedures which were conducted in big workshops or in

we need is a felting needle and colorful fibers which can all be found in the market easily. These new techniques revive felting, make it more common and prevent its fall into oblivion. Yet, these advantages end up in the shutdown of traditional workshops which will eventually make people forget traditional matting and felting. Although felts are more common today with the expansion of their areas of usage, traditional felting is still among rare artworks that are doomed to be forgotten.

baths are now much easier with this method. Thus, felting turned into a hobby. Dry felting, on the other hand, is a new technique which enables creating homemade felts. No soap or water is necessary for this felting. All

A six-domed Mimar Sinan architect:

# GRAND PIYALE PASHA MOSQUE

Constructive of the Grand Piyale Pasha Mosque, Chief Admiral Piyale Pasha, had the mosque constructed by Mimar Sinan in 1573. The Mosque stands out as one of the works created by the architect at the same time with Selimiye Mosque. Built as a social complex, the mosque lies in a valley once by the shore on the north of the district of Kasimpaşa. Apart from the known typology, the mosque has been built on arches supported by two 30,5 x 19,5 meter sized, rectangular shaped granite pillars. It has been covered with six domes, each of which has a diameter of about 9 meters and has been extended to the sides by vaults. The mosque and mausoleum among the buildings of the complex

GRAND PIYALE PASHA MOSQUE, CONSTRUCTED BY MIMAR SINAN IN 1573 IS ONE OF HIS ARTEFACTS THAT HE CONSTRUCTED AT THE SAME TIME WITH SELIMIYE MOSQUE.

survived up to date along with the taps of the rectangular fountain in the courtyard. However, among the madrasah, lodge, infant's school and market, none has survived. Stated in a large courtyard, the mosque is a six-domed structure covering an area of 54,6x45 sqm, and a minaret rises in the very centre of the entrance on the axis of the altar.

### *EXCLUSIVE STRUCTURE OF THE OTTOMAN ARCHITECTURE*

The mosque covers an area of 2,214 sqm and 22,500 sqm with the courtyard

in total. In 1570s, Piyale Mehmed Pasha had a social complex built, consisting of mosque, madrasah, dervish lodge, infant's school, mausoleum, market, hammam and public fountain, to open a rural part that was inhabited, to settlement in the valley behind Kasımpaşa. And only the mosque and mausoleum could survive up to date. Plan setup resembles to the traditional multi-strand/multi-domed (Ulucami) setup. It goes beyond the typology with the addition of two tier side mahfils (muezzin balconies), that are very common in the time of Sinan the Architect. The difference stands out not only with the one piece, slender and tall granite pillars instead of heavy stone bearings in the centre, carrying only the domes, but also with the side balconies being covered with vaults and dominating on side façades with their lancet frontons.

### SOME PARTS OF THE TILES ARE MISSING

Some part of the invaluable tiles of Kasımpaşa Grand Piyale Pasha Mosque have been stolen. Authorities stating that some tiles were stolen from the mosque in the past, said that some of the tiles on the wall had been broken and stolen during this time. Before Mimar Sinan, who was assigned to transform the dockyard building into a mosque, used tiles that were specially designed in Iznik tile workshops in the 16th century to decorate the mihrab and lancet window frontons and turned the mosque into a colour and flower garden by furnishing the southern and western walls with tile rims. The mosque, which was completed in 1573 is famous for its tiles. Disappearance of the tiles of Piyale Pasha Mosque dates back to the mid-19th century. Tiles stolen in that time are now exhibited in Paris Louvre Museum, Berlin State Museum, Vienna Traditional Arts Museum and Lisbon Gulbenkian Foundation Museum with the labels "From Piyale Pasha Mosque".

The strands of the qibla wall coinciding all structural axis, have been extended respectably and transformed into heavy buttress of an ordinary retaining wall.

Richness the architect brought to the outdoors in his authentic setup can only be understood with an analysis of twenty-eight lodges, seventeen madrasah cells composing the courtyard, and "double portico" around the main body and two tier outer wings altogether. All these can be evaluated as the outdoor arrangements that are not quite well matured in terms of functional solution. But on the other hand, this exclusive structure of the Ottoman architecture needs a careful emphasis.

## INTERNATIONAL HOME & HOUSEWARES SHOW 2017

National participation by Turkey to International Home & Housewares Show 2017 Fair will be made for the 13th time by Istanbul Minerals and Metals Exporters'

Association (IMMIB) this year. Considered as one of the most important fairs in the houseware, kitchenware and cookware sector, The Home & Housewares Show 2017 will take place

on March 18-21, 2017 in Chicago, USA. IMMIB will participate with 10 companies in total over an area of 232 square meters at the Northern and Southern halls of the exposition area.

Participating companies will display griddle, non-stick pan, enamel, plastic, melamine, metal and glass kitchenware, bathroom supplies and housewares.

## WE WILL BE AT HONG KONG HOUSEWARE 2017 FAIR

This year, 25 of our companies will be participating in the Hong Kong Houseware Fair with a national participation organization for the 13th time on April 20-23, 2017. Our national participation stands will be located right at the entrance of Hall 3D which is usually crowded by visitors and our stands will be set on an area of 564 square meters. Houseware and bathroom supplies out of plastic and metal along with stainless steel, griddle and aluminum cookware as well as souvenirs made out of glass will be displayed as part of our product ranges on our national participation stands.
