

TURKISH PAINTS CLUSTER

ABOUT İKMİB

Since its foundation in 1991, the mission of İKMİB (Istanbul Chemicals and Chemical Products Exporters Association) has been to sustain the professional ethics and cohesion of Turkish export companies in the chemicals industry, help increase export levels, diversify export products, help increase products' competitiveness, defend its members' rights and interests, and help them form strong relationships in the international arena and support them to get into new markets. To that end, our Association takes active part in international organizations and continues the organizational work in Turkey. The goals are to be in close relationships with all the sub-sectors of the chemicals industry, follow new developments and innovations in the sector closely, and engage new customers from overseas.

Being one of the leading power of the Turkish economy, the chemicals industry grew significantly in the last 10 years together with its sub-sectors. Being one of the top exporting sectors in our country, chemicals industry is breaking its own records.

The industry's export goal for 2023 is 50 billion dollars. İKMİB continues its already effective support efforts in organizing various activities to inform, support and help build cooperation among its members and support their member companies to be leaders in global markets. Association supports organizations for national participation at international fairs for all sub-sectors of the industry (plastics, cosmetics, medicine, paint etc.), technical seminars, trade and buying missions, and R&D projects to help increase sustainable growth in the industry.

Company Profile: Polar Kimya was established by H. Lütfi Milli, chemical engineer, msc, in 1980 and reinforced its place in the sector over the last 35 years. It is an entrepreneurial chemical manufacturing center that constantly incorporates new products into its portfolio by means of R&D activities. The firm manufactures many products addressing to different fields of use, playing an important role in the chemical sector through this wide range of products. Polar Kimya has taken its first step in the 'floor chemicals' in 2005. It initially started with parquet chemicals in the area of floor chemicals and it has incorporated 'polyurethane floor coating systems' into its portfolio. Thanks to its manufacturing power and know-how, Polar has received positive responses from the industrial sector as the first and the only manufacturer of saturated polyester polymers in Turkey, reflecting its technical superiority and cost advantage. The firm continued to develop and grow, introducing epoxy floor coating systems in addition to polyurethane floor coating systems. It incorporated the steel and industrial paints. In 2014 Polar Kimya has introduced the polyurea coatings. Polar Kimya, from the year it has been established in 1980 until today, continues to serve its domestic and overseas customers. Some of the countries that our products are exported to are as follows: Albany, Algeria, Azerbaijan, Bulgaria, Georgia, Iran, Kazakhstan, Moldova, Saudi Arabia, Sudan, Russia, Turkmenistan.

Products: Furniture Paints & Varnishes - Polyurethane & Epoxy Floor Coating Systems - Industrial Coatings - Polyurea - Alkyd Resins
