THE MAIN FUNCTIONS OF THE ASSOCIATION

Istanbul Chemicals and Chemical Products Exporters' Association is a professional establishment which manages the export activities of its members. It was established in 1991 and now has more than 6000 members. The main purpose of the Association is to increase the export volume of the Turkish chemical and chemical products sector. Moreover, the Association conducts activities to increase competition by offering products of high quality from its member companies.

Within this context, the main functions of Istanbul Chemicals and Chemical Products Exporters' Association are as follows:

- Providing sectoral collaboration
- Improving the export volume of the chemical and chemical products sectors on behalf of our members and in accordance with the needs of our country
- Organizing training courses, seminars and meetings related to the subject matter of chemicals and chemical products
- Supporting our members at the national and international level with any difficulties they encounter related to export/trade activities
- Organizing trade fairs, arranging promotional activities and establishing laboratories.
- Organizing national and international meetings of our exporters
- Preparing promotional films and CD's in order to promote Turkish chemicals and chemical products in the international area
- Organizing national/international trade fairs
- Organizing meetings of our exporters with "Buying Missions" from different countries of the world
- Establishing "Trade Missions," which are composed of Turkish exporters, to the target markets
- Offering seminars, conferences and training courses for our members
- Following developments in international law and informing our members about them
- Preparing annual reports about the export performance of the sector
- Conducting research for the new market
- Preparing reports about "target markets" and "target sub-sectors"
